

Advanced Forecast Report for

Barack Obama

4 August 1961
19:24
Honolulu, Hawaii

17 May 2010 - 17 June 2010

Your Astro-Forecast begins on the next page. If the time period for an interpretation is, for example, given as "July 1, 1993 (June 15, 1993 to July 15, 1993)", then it starts in mid-June, reaches greatest intensity around July 1, and ends in mid-July. The first date listed is the time when the influence has reached maximum strength; we can call this date the "peak date". The influence starts on the beginning date, gradually increases in strength until the peak date is reached, and then it gradually fades out until the ending date is reached. An influence may last for as little as a week to as long as half a year or so.

You may also notice that the same interpretation shows up periodically during the year; this is not unusual. In some cases the beginning and ending dates of the 2 influences are the same; the only difference between the 2 interpretations is the peak date. This means that this particular influence has two peak dates instead of one. It is even possible for there to be three or more peak dates for the same astrological influence. To eliminate redundant interpretations, you may be informed that the astrological influence also occurred earlier and that you should refer back to the previous occurrence of this interpretation.

You may be wondering what the funny symbols after the dates are. For example, you may see "☉ □ ♁", "♂ ♃ ♁", etc. These symbols show the astrological factor that is in effect.

We hope you enjoy your Astro-Forecast.
